Tipos de variable

JS

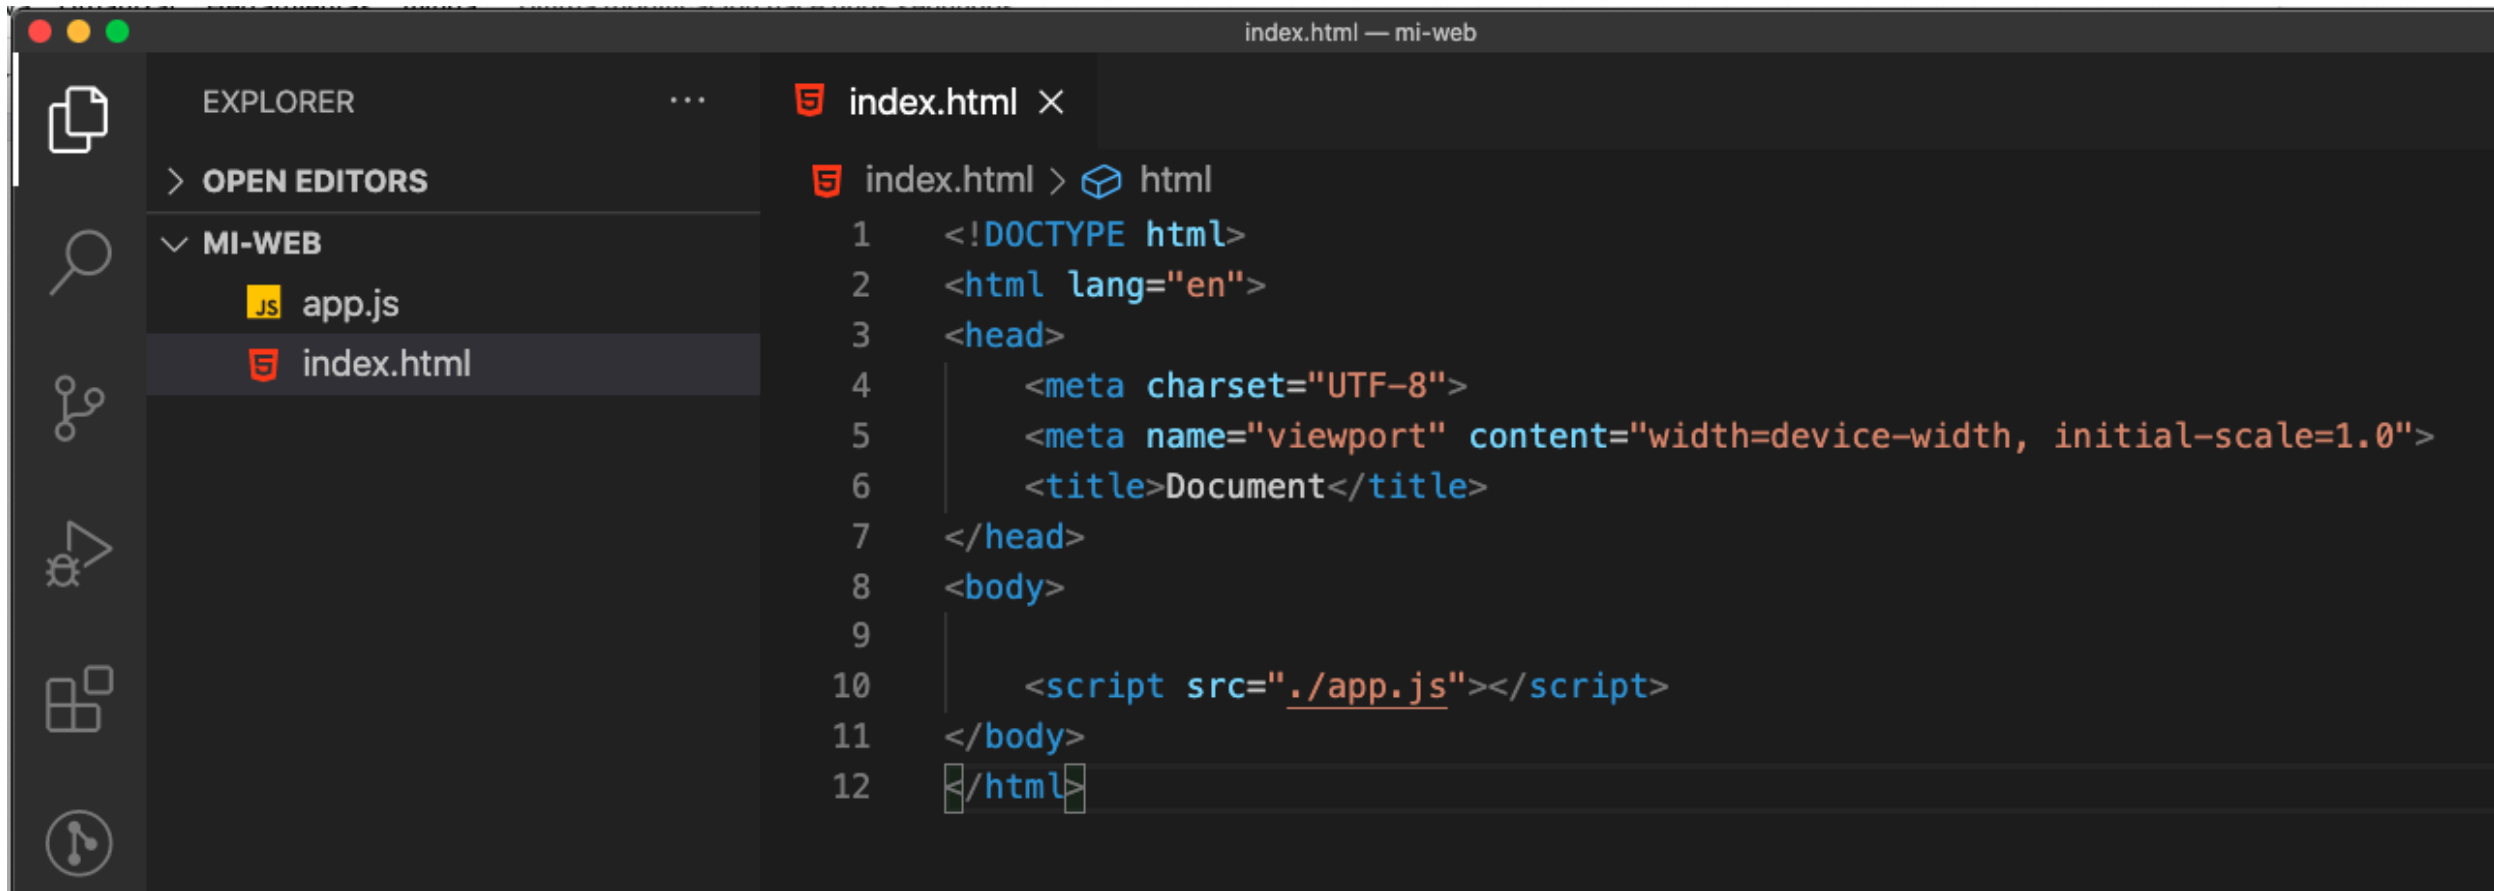

~~VAR~~

LET

CONST

```
JS Untitled-1 •
1
2
3   const miVariable = 'Soy el valor de una variable'
4
5   let colores = ['amarillo', 'negro', 'blanco']
6
7   const $ = 1000;
8
9   let _persona = {nombre: 'juan', edad: 22}
```

Usar javascript desde HTML

The image shows a screenshot of the Visual Studio Code editor interface. The Explorer sidebar on the left shows a project named 'MI-WEB' containing two files: 'app.js' and 'index.html'. The 'index.html' file is open in the main editor area. The code in 'index.html' is as follows:

```
index.html — mi-web
index.html x
index.html > html
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4      <meta charset="UTF-8">
5      <meta name="viewport" content="width=device-width, initial-scale=1.0">
6      <title>Document</title>
7  </head>
8  <body>
9
10     <script src="./app.js"></script>
11 </body>
12 </html>
```

Muchas Gracias
